RESIDENCY EXPERIENCE

the new season of *artistic residencies*
of Studio Corte 17

A program of **artistic residencies** within the space of SC17 at Chiara Bettazzi's studio

The residencies represent an opportunity for emerging artists and curators to experience the **contemporary artistic scene** of Prato. SC17 provides a workspace and tutors to engage with throughout the training and work path.

An experience of temporary training and research to be defined according to one's own needs, with methods to be agreed upon with the SC17 team. In this way, it is possible to create a residency program made specifically for the candidate.

For this reason, a application is required, which includes sending a curriculum vitae and portfolio, in order to discuss the methods of work and research beforehand.

The residency experience has a unique and exclusive character that arises from a **deep knowledge of the territory and the contemporary artistic dynamics that inhabit it**. For this reason, the program has been designed to provide young artists and curators with the necessary experiences for their formation.

- A **Temporary studio** within an artist's studio.
 - **Tutoring**
 - **Tours** of the natural and architectural landscape of the city of Prato
 - Visits to independent spaces to promote **knowledge of multi disciplinary artistic realities in the Tuscany region**.
 - **Studio visit** with artists who work in Tuscany
 - Organization of **Open Studio** events for the resident artists and curators
 - **Technical support** in the development of the work
 - A **Network of professionals** to interact with
 - Development, planning, and setup of one's own **art show in the spaces of SC17**.
-

SC17's space is currently fully active and is an open-plan area located in an industrial building from the early 1900s. It is a versatile space measuring 150 sqm, complete with toilet facilities and a kitchen, and overlooks the courtyard through a large window and industrial door. The roof is made of white-painted trusses.

SC17's garden extends into the Via Genova courtyard, offering a new outdoor living space.

The Via Genova courtyard, which was reclaimed from abandonment, is located within the vast industrial complex of the former Lanificio Bini and is made up of a series of former factories facing a central courtyard. Today, the former industrial courtyard covers an area of about 1000 sqm and borders the historic center of Prato, the Ex Macelli, the Macrolotto Zero, and the area of the former Ospedale Misericordia, which will soon be transformed into the city's new urban park.
